

# U.S.W Social Work Flow

The work flow for the realization of U.S.W is as follows.

- (1) Freeze + close bank accounts, securities, and stocks around the world at a certain global coordinated time
- (2) Carry out specific system work in advance by tax specialists including UN staff  
Collect and deposit the total amount of deposits divided by 9/10 into a bank account with the United Nations (with adequate security measures) in one go.  
Divide the remaining balance (1/10) by the number of all deposit accounts and transfer the amount evenly to each deposit account.  
This work is as money needed for the time being

After that, experts from the United Nations and former countries will promptly make preparations for free distribution of products to each retailer, and at the same time as the free distribution starts, the amount of the product will be automatically transferred to each retailer at all times.

The span from the closing of the deposit account to the free distribution of products shall be within 48 hours.

All lifelines (infrastructure) shall be free of charge.

The free infrastructure mentioned above will start from the construction of the U.S.W constitution.

Companies pursue profit by selling other value-added products to keep the company alive.

Regularly monitor company net income flows

In consideration of the decreasing trend in the deposit amount at the U.S.W headquarters, we will regularly carry out the above work and always maintain a social situation in which free distribution is possible.

Due to post-capitalism, the concept of stocks has disappeared, and companies can operate independently without being conscious of shareholders!

However, only futures trading is permitted on the securities exchange market.

The current payment method for reading barcodes remains the same... Only the input/output is a problem that can be solved by switching the system... Use what can be used... Purchase or build a new one

There is no need...it's a waste of time + effort + money!

Basically, people are guaranteed a livelihood, so after that, people who work for companies, people who work in specialized fields, etc. Depending on their efforts, they will be recognized by the company and society, and they will earn extra income ... a little Buying expensive things...that's all there is to it.

However, everyone is equal and there is a fixed upper limit for free distribution per year, and the remaining balance can be viewed on the Internet using a powerful secure system!

Also, as mentioned above, depending on the effort, companies and society will have a mechanism to pass the amount to the other party using an electronic certificate,

The very existence of money will disappear!

Restaurants are naturally positioned as sales outlets!

Abolish current gambling-like occupations... Abolish them because they do not generate social productivity + from the perspective of addiction!

However, from the perspective of securing employment

- ① Pachinko and slot business
- ② Horse racing
- ③ Keirin
- ④ Boat race
- (5) Frequent lotteries, etc.

Integrates the above occupations into one company and realizes the launch of a new company by a professional entrepreneur advisor!

however,

- ① U.S. Las Vegas
- ② Hong Kong Macau

For tourist cities, consider tradition and culture and leave things as they are!
